# Water Tank Problem

Given `n` always greater than -1, representing the block height. Now compute the units of water stored in-between the blocks. Build a Web Application (Frontend Solution) using **Vanilla JavaScript and HTML/CSS** to represent the solution.

Hint: Generate SVG Shape (preferred) or Table View like the one below,
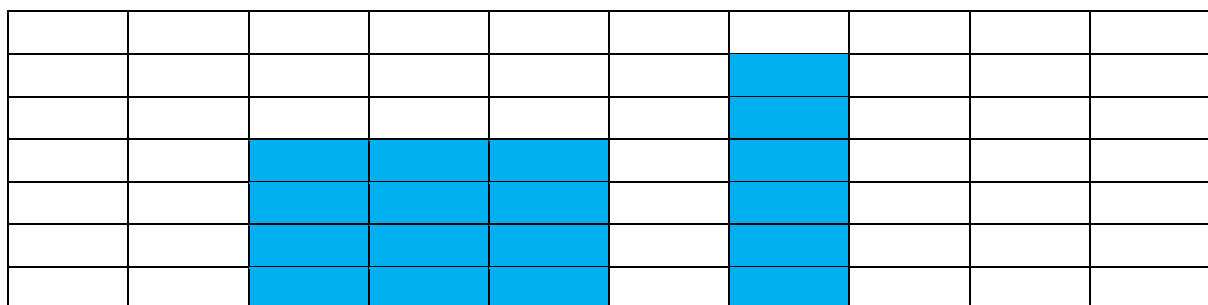

Example

Input

[0,4,0,0,0,6,0,6,4,0]

Output

18 Units
